About me

Computer Science undergraduate with experience in machine learning and web development. Built computer vision and fraud detection systems and API-driven web applications. Samsung PRISM research intern seeking Software Engineering or Machine Learning internships.

Technical Skills

Programming: Python, Java, C/C++, JavaScript
Web Development: HTML, CSS, React, Tailwind
Machine Learning: Scikit-learn, TensorFlow, Pandas, NumPy, Matplotlib
Tools: Git, Streamlit, VS Code

Internship

Samsung PRISM Program Sept 2025 – Jan 2026

Research Intern

- Developed computer vision models for a plant disease detection mobile application.
- Trained and evaluated 3 deep learning models using 1000+ plant leaf images.
- Conducted 10+ training experiments to improve classification accuracy.
- Built preprocessing and data augmentation pipelines to improve model robustness.

Smart Bridge May 2025 – Jun 2025

Machine Learning Intern

- Developed fraud detection models using Logistic Regression, Random Forest, and XGBoost.
- Processed and engineered features from 280K+ financial transactions.
- Achieved 99.9%+ accuracy through hyperparameter tuning and evaluation.
- Built a Streamlit web app for real-time fraud prediction.

Education

Vellore Institute of Technology, Chennai 2023 – Present

B.Tech in Computer Science and Engineering

CGPA: 8.71

Projects

Samsung Plant Disease Detection Model | *Deep Learning* [GitHub Repository]

- Trained and evaluated 3 deep learning architectures on 1000+ plant leaf images.
- Applied preprocessing and augmentation techniques improving model robustness across varying lighting and background conditions.
- Designed the inference pipeline for integration into a mobile-based plant disease detection application.

MacOS-Style Portfolio | *React, Vite, SCSS* [Live Demo]

- Built a responsive macOS-inspired desktop interface featuring a functional Dock and top navigation system.
- Integrated **react-rnd** to engineer draggable and resizable application windows with smooth transitions and bring-to-front z-index logic.
- Developed custom window components including a functional in-app CLI terminal, notes, and a resume viewer.

ScoopCast Movie Discovery Platform | *Web Development* [Live Demo]

- Built a responsive movie discovery web platform using HTML, CSS, and JavaScript.
- Integrated TMDB API to dynamically fetch and display 1000+ movies and TV shows.
- Implemented search, filtering, and dynamic rendering features for improved user interaction.

Productivity Dashboard Website | *Web Development* [Live Demo]

- Developed a multi-feature productivity dashboard using HTML, CSS, and JavaScript to manage daily tasks and improve focus.
- Implemented 4 integrated tools: To-Do List, Daily Planner, Pomodoro Timer module within a unified interface.
- Added contextual information including real-time date, time, location, and weather data.
- Implemented responsive UI ensuring smooth usability across desktop and mobile devices.

Certifications

Samsung PRISM Program Certification | *Samsung R&D • 2026* [View Certificate]

Machine Learning Internship Certification | *Smart Bridge • 2025* [View Certificate]
